

NORCOLD DE0751 and DE0740 CHANGES AND IMPROVEMENTS

In 2009 model DE0751 replaces the DE0051. The DE0740 replaces the DE0040.

- Cut out dimensions are nearly identical for the “proud” mount with door set out from flush mount frame the same as the former DE0051 and DE0040 door position. There is an optional flush mount door bracket available that pushes the refer box back an additional 2-1/8” in depth.
- Please e-mail or call us if you have any questions on part numbers for each optional door treatment and pricing.

CHANGES AND UPDATES TO THE NEW DE0740 AND DE0751:

1. There are several new model versions of each refrigerator given expanded door panel **options of black panel, stainless flat panel or stainless door wrap.**
2. There are several new model versions based on expanded options of “**proud**” (door pushed out from flush cut out) mount **or flush** (door flush with cut out) **mount.**
3. **Optional flush mounting kits** are available for black or stainless refrigerators.
4. Door and latch redesigned for easier open and closure using “**squeeze**” **latch handle** in top edge of door.
5. Door latch and pin redesigned for **more positive locking action.**
6. Door latch **pin is stainless steel.**
7. Door and hinge designed to pass heavy duty 150 lb dead weight open and closure test to reduce possibility of door and opening deformation.
8. **Door redesigned** for more contemporary look with stainless steel wrap option.
9. **Improved “Self Venting” design** for cooling efficiency resulting in less run time and further reduced amp draw.
10. **Larger, more rugged cooling unit** (Evaporator and Condenser) for faster cooling and increased life.
11. **New top Grill Vent design** is more rugged to reduce possible shipping and installation damage.
12. Centering of thermostat control for balanced exterior look.
13. **Improved access to door panel** for changing / installing to custom interior styling match.
